

To whom it may concern;

Please do not take any restrictive action against satellite radio companies such as XM and Sirius for their offering of local traffic and weather. People such as me pay for the service and in no way does this affect local radio stations. I rarely if ever turn off my XM to listen to local radio. Having traffic and weather on XM is just an additional service offered by XM that in no way hurts the local radio companies, not anyone can receive these channels, only subscribers can do so and as a subscriber I think that the local radio companies should not be immune to competition from a very viable and competent company such as XM or Sirius. If the local radio stations cannot put up with the competition then they need to leave the business that is what America is all about. Do not restrict satellite radio.

Thank You
Sincerely
Mark R Paul
